The "short name" for Catalyst Corporate in the FedWire system is: CATALYST CORP FCU

International Wires/Catalyst Corporate's BIC1

Catalyst Corporate does not have a SWIFT code that allows international wires to be directly from an international bank to Catalyst Corporate. The sending international need to go through a U.S. correspondent bank or through a foreign correspondent bank a banking relationship with a U.S. correspondent bank. Catalyst Corporate does have a SWIFT/BIC1 code that can be given to an individual or an institution in another country for wiring funds into the United States. For the international bank and the U.S. correspondent this code identifies Catalyst Corporate as a legitimate party to the wire. Please note that a BIC1 is an "inactive" BIC, used only for identification purposes. This BIC can only appear in the text (Block 4) of a FIN message – party field 57A or 58A, for example, to identify your institution as the beneficiary of a payment. If an "inactive" BIC appears in the header of a FIN message, the message will be rejected by FIN. **Catalyst Corporate's BIC1 code is CCFDUS41.**
